Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by Chou.

See headrail 131, shafts 34, adjusting units 37, slat holders 31 and slats 135.

The tilting angle of the slats can be changed independently, column 10, lines 5-8.

Claims 5 and 6 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Frentzel et al.

See shaft 15 with sections of oppositely pitched helical grooves. See also adjusting unit 15A, 18A, slat holders 12 and hooks 133. The angle adjusting means is shown in Fig. 4 and discussed in the specification in relation thereto. Due to the oppositely threaded sections of shaft 15, rotation thereof promotes opposite rotation of the slats prior to accumulation of the slats, i.e. movement thereof along the shaft.

Allowable Subject Matter

Claims 2-4 and 7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
